

A DIVERSE PYRAMID

Advance we must through a pyramid...
Enter into a world of education
A place of higher learning.

Every day our brains yearn for more and more
Of the knowledge we seek.
For within these urban walls
The skills needed to fortify our minds
Are available from week to week.

Candid are the teachers and staff
Who reinforce the integrity of every woman and man
As all of us learn as we might...doing all we can.
These teachers supply the students with material that is challenging,
In a way that is easy to comprehend.

We all look toward a future where both novices and journeymen
Are significant to the restructuring of our intellect.
English, Math, and Computer Technology
Are vastly changing, growing in complexity.
This is why I am here,
This is why we are here;
To boost our morale and illuminate our legitimacy...
To advance!
